

As we have had many new residents join our web alert system; I thought it might be a good thing to explain how to navigate our site

Each tab will take you to the page of the heading. Some Headings have sub pages.

When you are instructed to go to a link from the Alert, you will see **the Heading will be in all Capitals** / if a subcategory it will be in small print

On right side of the welcome and contact page is our yearly calendar. WE will post dates as soon as received and is updated continually. Check back often

The next HOA meeting is always at the top followed by our things to ponder. We try to have something interesting and sometimes funny
