

How to fix security issue when accessing our website

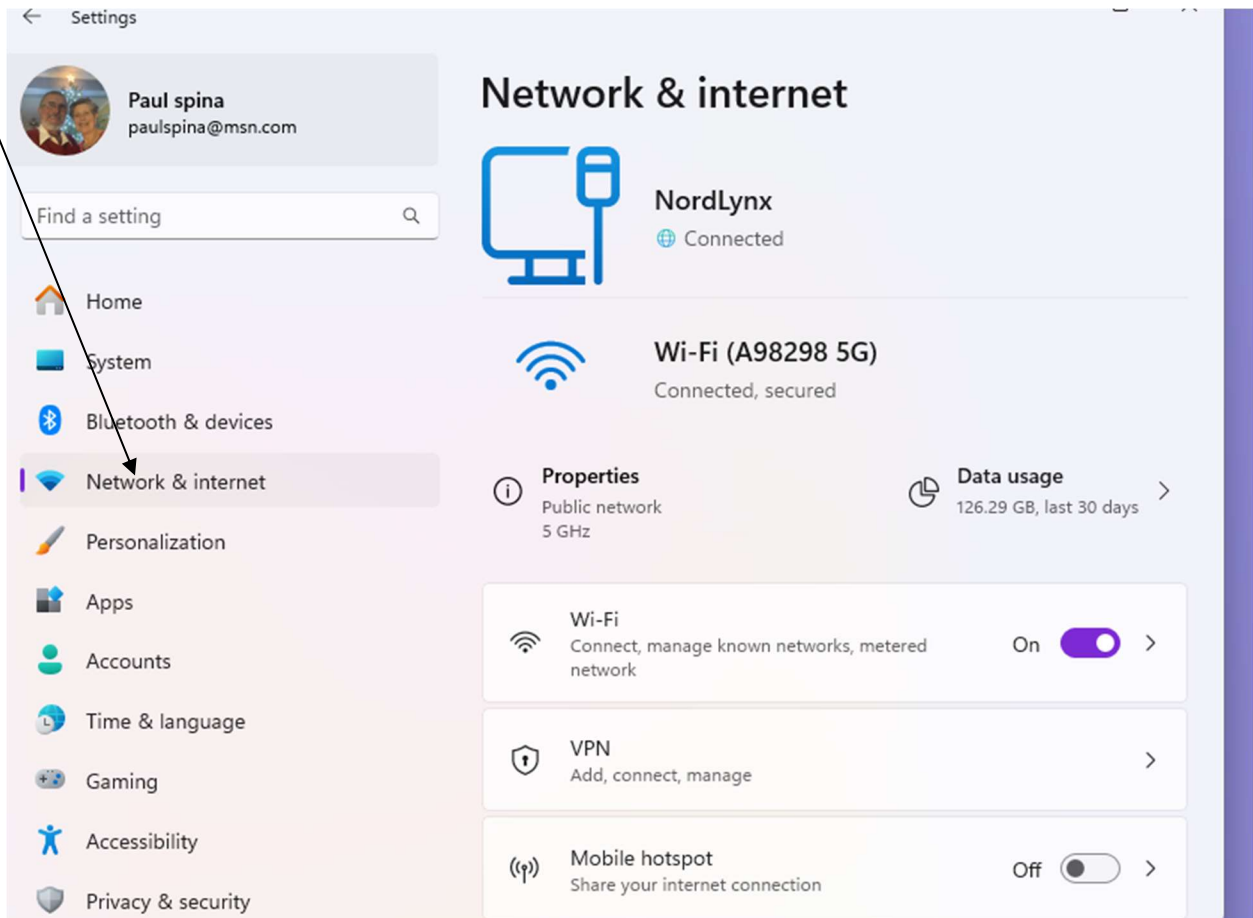

Go to settings:

and click on it

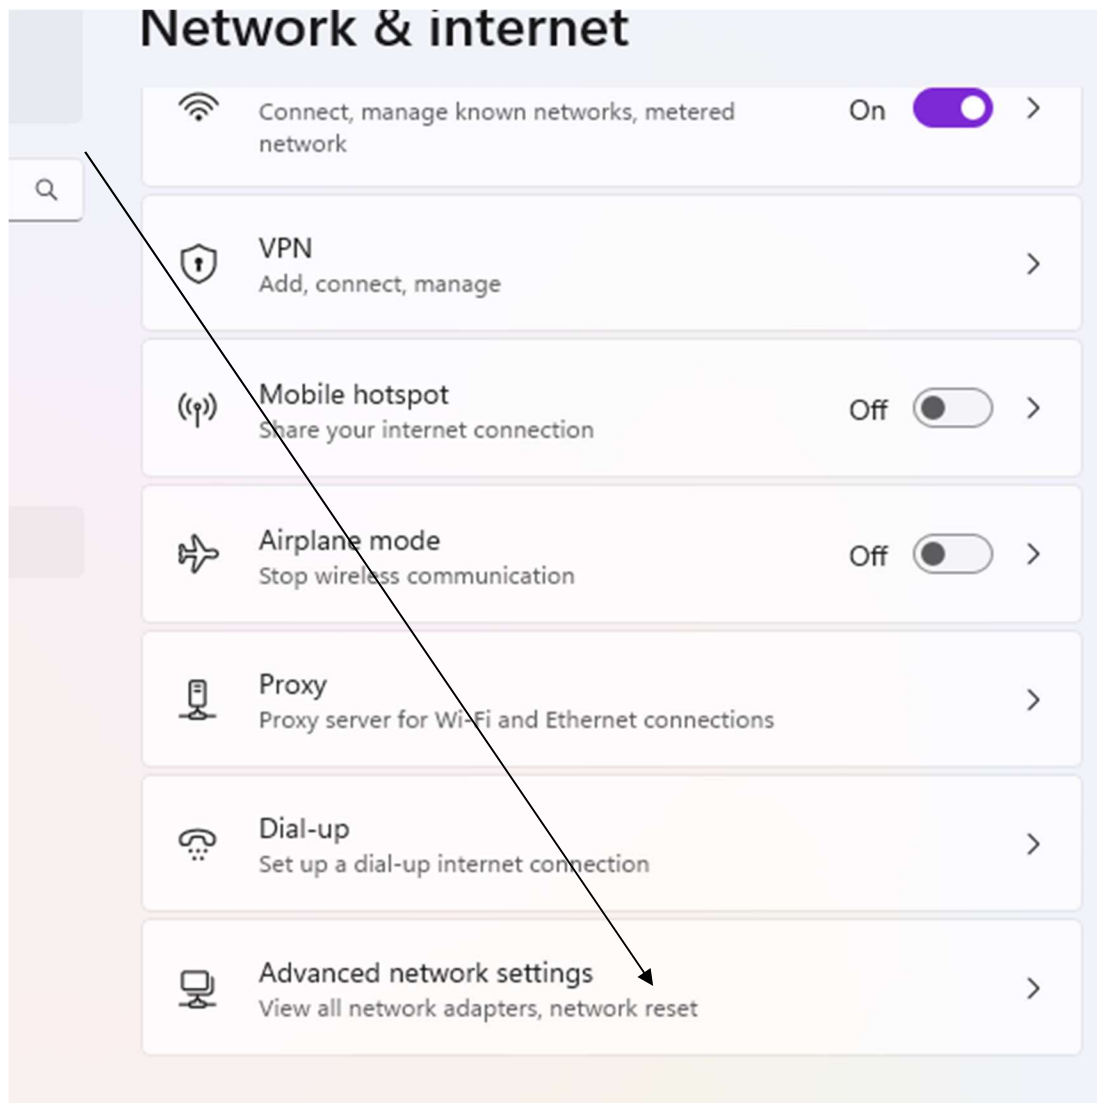

Next:

On next page click on **Network and Internet**

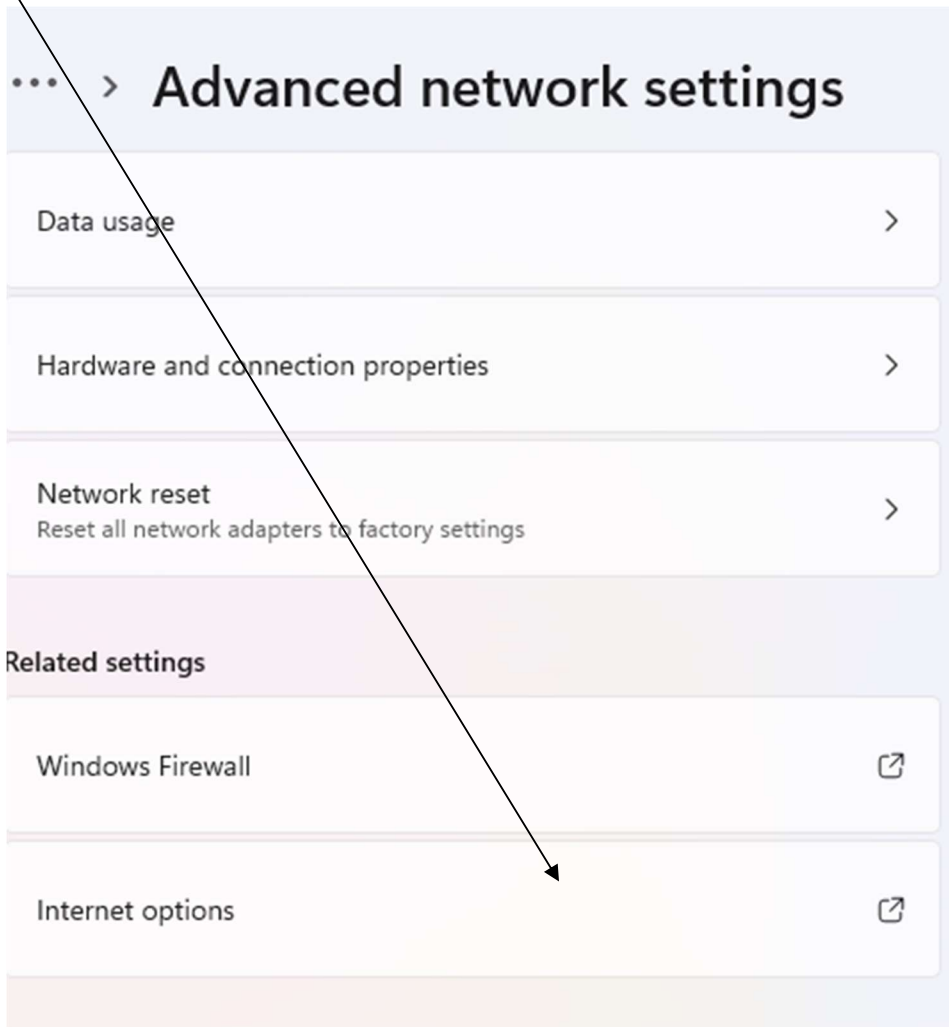

Next:

On Network and Internet scroll down on right side to Advance Network settings and click on it

Next:

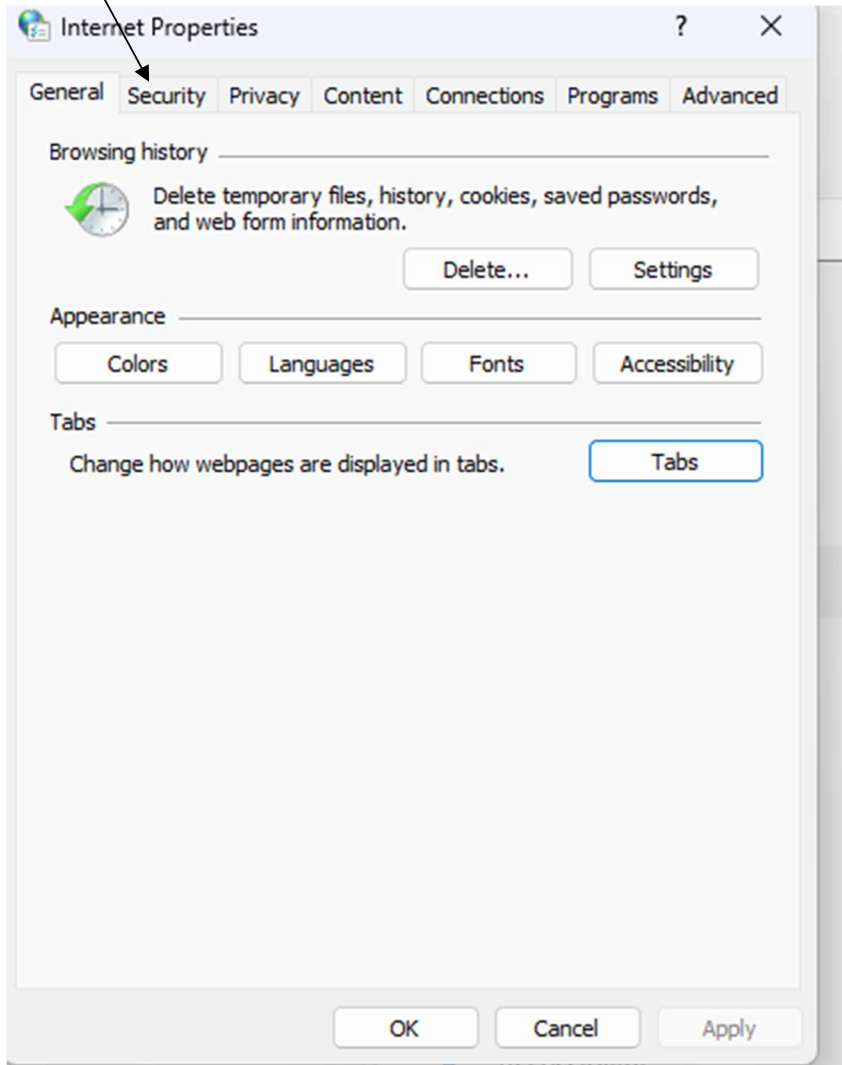

Click on Internet Options

Next

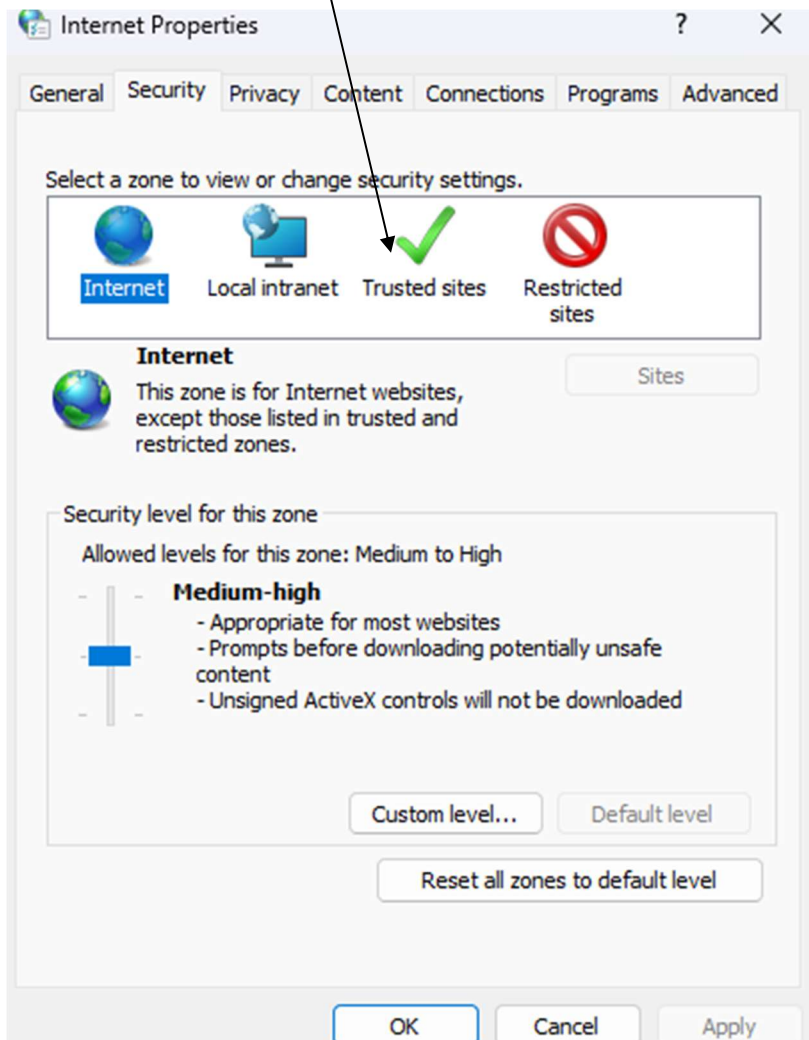

A pop-up box will appear.

Click on the word Security

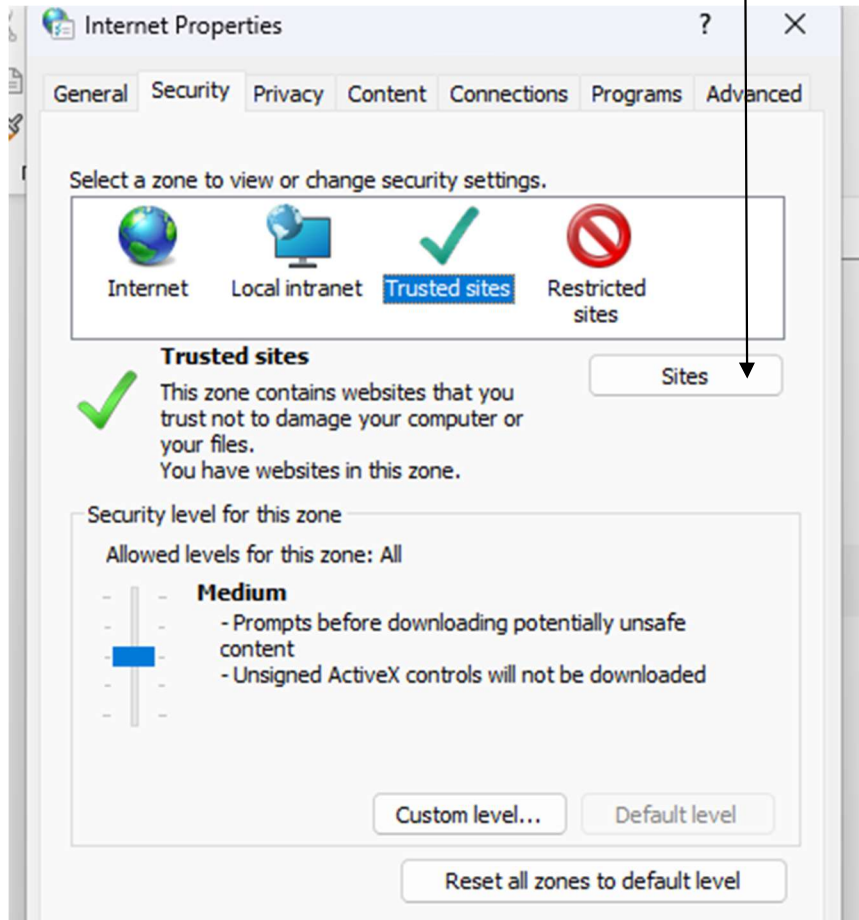

Next

Click on Trusted Sites

Next:

Click on sites. And a new box will appear.

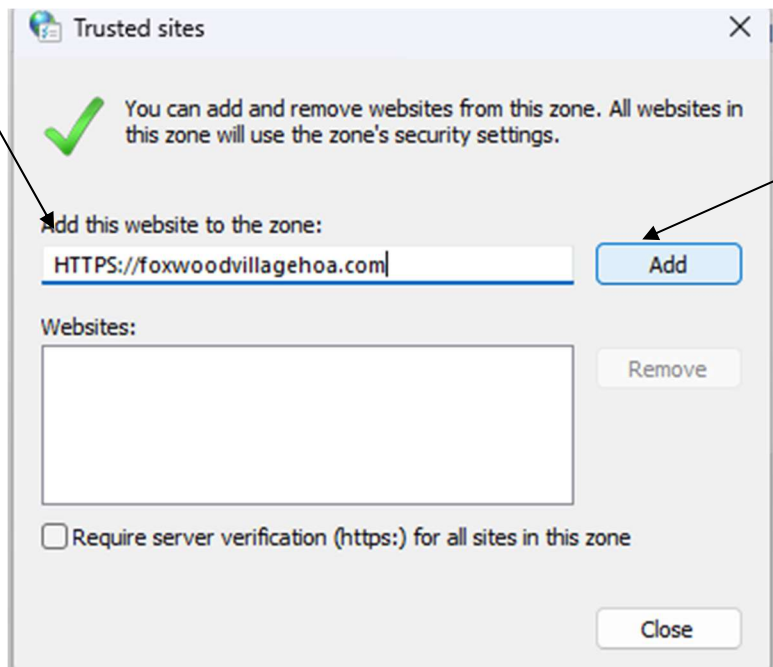

NEXT

On the top line add the following **exactly** as written. When you have finished typing in the line click add

<https://foxwoodvillagehoa.com/site>

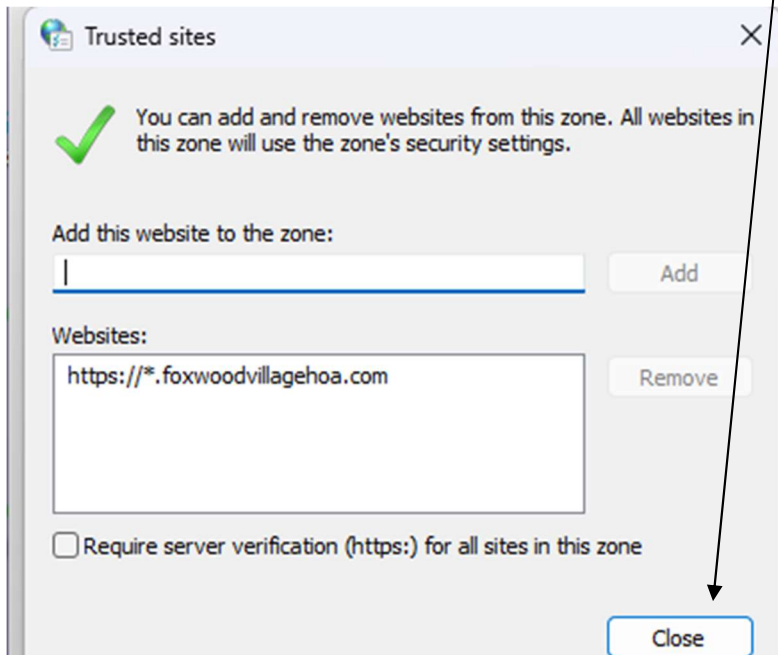

1st step enter the web address

2nd Click ADD

•
NEXT

Once you click **ADD** the typed line should appear under websites exactly like below. Once you see this Click **Close**

NEXT

Click on **OK** and then exit site. (Hopefully all your problems are solved.)
